

## SELF BALLASTED INDUCTION LAMPS

### Introducing Duraguard Self-Ballasted Induction Lamps!

Duraguard is proud to now carry Premier Lighting Manufacturers brand lamps and accessories. Duraguard now has Self-Ballasted Induction lamps in stock and ready to ship. Self-ballasted Induction lamps provide all of the benefits of Induction lighting (such as a 60,000 hour life!) with the convenience of a standard screw-in bulb.

**COMING SOON!**

Our new Mogul Base Induction Adapter allows you to retrofit an induction lamp and driver in existing fixtures without the need for special lamp brackets. This is also a perfect fit for a variety of our High Bay models. The idea is simple; install the induction driver in the housing, wire the induction lamp to the adapter, and then screw the adapter into the existing mogul base socket. No special lamp brackets needed means quick and easy installation-for new or retrofit installations!

***Mogul Base Induction Adapter can be used in these Duraguard Products:***

Deluxe High Bay #DHB

Thermalux High Bay #THB

Thermalux Low Bay #TLB

High Bay #HB

Reflector Bay #RB

**REFLECTOR BAY**

The Reflector Bays are available in 16" or 22" models ideal for compact fluorescent or self-ballasted induction! Both feature a spun aluminum one-piece exterior housing/reflector combination. An optional flat tempered glass lens with gasket is sold separately. Mount with a malleable hook or a downrod. Max 200w self-ballasted CFL or 40w self-ballasted Induction.

**THERMALUX GARAGE LIGHTER**

Thermalux Garage Lighter #TGARAGE

The Thermalux Garage Lighter is part of our Electronic HID line of products and is also available as an induction model! This fixture is ideal for cold storage, garage lighting, or low-bay applications. The round die-cast housing with built-in heat sink is designed exclusively for electronic ballasts. It features a white powdercoat steel reflector, extended clear polycarbonate prismatic drop lens, and Easy-Hang bracket for mounting. Max 200w PSMH or 150w Induction.
